Subhashree Subhalaxmi Sahoo

Frontend Developer (Angular)

Bangalore, Karnataka
Mobile: +91 XXXXXXXXXX
Email: subhashree2220@gmail.com
LinkedIn: subhashree-subhalaxmi
Website: subhashree-subhalaxmi

Frontend Developer with over 3 years of experience, including 2+ years of hands-on expertise in Angular development. Strong background in building responsive, scalable Single Page Applications (SPAs) using Angular (v16 to v18), TypeScript, JavaScript, HTML, SCSS, and RESTful APIs. Known for writing clean, maintainable code and delivering consistent UI/UX across platforms. Skilled in micro frontend architecture, UI/UX optimisation, state management with RxJS, and Agile/Scrum methodologies. Able to deliver high-quality code with minimal supervision and strong team collaboration.

EXPERIENCE

Recstech Technology Pvt Ltd, Bangalore —*Associate Software Engineer*

Jan 2024 - Mar 2025

– Developed enterprise-scale web applications using Angular v16 to v18, Angular Material, and SCSS.

– Built modular, reusable UI components and implemented Reactive Forms, Routing, Auth Guards, and Pipes.

– Used RxJS Observables and Emitters for state management and asynchronous data flows.

– Integrated Angular applications with RESTful APIs across multiple modules.

– Participated in Agile ceremonies and contributed to code reviews and sprint planning.

Zing Technologies, Bangalore — *Associate Software Engineer*

Jan 2022 - Dec 2023

– Worked on internal projects involving Angular v16 for developing and enhancing web application modules.
– Created reusable UI components and handled basic integrations with RESTful APIs.

– Collaborated with the team on feature implementation, UI improvements, and bug fixes for in-house tools.

TECHNICAL SKILLS

– **Web Technologies:** Angular (v16–v18), Angular Material, Bootstrap 5, RxJS

– **Languages:** TypeScript, JavaScript, HTML5, CSS3, SCSS

– **Tools:** Git, Jira, Figma, Canva

– **Concepts:** Routing, Reactive Forms, Auth Guards, Pipes, Directives, Change Detection, Observables

– **Architecture:** Micro Frontends, Standalone Components, Webpack Module Federation

– **CMS:** WordPress, Wix

– **APIs:** RESTful Web Services

– **Development Methodology:** Agile, Scrum

EDUCATION

Koustuv Institute of Self Domain, Bhubaneswar — *B.Tech (CSE)*

June 2017 - June 2021

CERTIFICATION

– Angular 15 Certification – Vskills

PROJECTS

Dealer Management System (Toyota)

Angular v12, TypeScript, Bootstrap 5, SCSS

- The Dealer Management System (DMS) for Toyota is a comprehensive platform tailored for overseeing dealership operations seamlessly.

- It encompasses functionalities for brand and outlet management, vehicle model tracking.

- Lead management and promo code handling are integrated features, facilitating efficient handling of sales leads and promotional activities.

- The system enables Toyota users to create quotations and invoices, streamlining sales transactions.

- Customer feedback and issue management are facilitated, enabling quick resolution of concerns and enhancing overall customer satisfaction.

- The DMS acts as an all-in-one solution, optimising dealership processes and ultimately driving business success within the Toyota network.

Dealer Management System (DMS)

Micro Frontend Architecture
Angular v18, Standalone Components, Web pack Module Federation

- Architected the application into deployable modules (Sales, Finance, Marketing, Service, Loyalty, etc.)

- Used Web pack Module Federation for seamless integration and version control.

Human Resource Management System (HRMS)

Angular v18, TypeScript, SCSS

- Developed features like employee profiles, attendance tracking, payroll and

compliance dashboards.

- Automated HR operations and built employee self-service portals to improve

Efficiency.

SELF-STUDY PROJECTS

- <u>Live Weather App</u> (ReactJS)

- <u>Tinder Clone</u> (ReactJS)

- <u>Tic-Tac-Toe Game</u> (JavaScript)

- <u>Photography Website</u> (HTML, CSS)

- <u>Technical Documentation Page</u> (HTML, CSS)
